[C.—7279.] Price 1d.

No. 2,004.

DUBLIN CASTLE,

*13th February, 1894.*

GENTLEMEN,

I have to acknowledge the receipt of your letter of the 12th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Annual Report of the Royal University for the year 1893.

I am, Gentlemen,

Your obedient Servant,

D. HARREL

The Secretaries,

Royal University,

Earlsfort Terrace.

# TWELFTH REPORT

OF

## THE ROYAL UNIVERSITY OF IRELAND.

---

TO HIS EXCELLENCY ROBERT BARON HOUGHTON, K.P., &c., &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND,

ROYAL UNIVERSITY OF IRELAND,  
*February 10th, 1894.*

MAY IT PLEASE YOUR EXCELLENCY,

I have the honour to submit the Annual Report on the condition and progress of the University,

The total number of persons who entered for the various Academic Examinations of the University during the year 1893, was 2,951; while in the previous year there were 2,857.

The Appendix to this Report contains Tables giving all important details connected with the Examinations held in 1893, for both male and female candidates. A Table is also given showing the Academic progress, in the various Faculties, made by Students matriculated in 1881 to 1892 inclusive.

I have great pleasure in stating that the Senate have decided to offer annually for competition amongst the Graduates in Arts of the University, of not less than two years standing, three Junior Fellowships, tenable for four consecutive years, of the annual value of £200 each: and to offer for competition amongst the Graduates in Medicine of the University, one Medical Studentship, tenable for two consecutive years, of the annual value of £200. The Examinations for Junior Fellowships and for Medical Studentship will be held, for the first time, in October, 1894, and will be open to Candidates of either sex.

There were two public meetings of the University in 1893. The first was of a formal character, and was held on the 13th day of May, for the purpose mainly of admitting to their degrees the candidates who had passed at the Medical Examinations held a short time previously.

The usual annual meeting of the University to confer degrees in the several Faculties, and to declare the distinctions obtained by candidates at the Honour Examinations, was held on the 28th October. Details of proceedings at this meeting are given in Appendix II.

In conformity with the provisions of the Act of Parliament, 44 and 45 Vic., chap. 52, the accounts of the receipts and expenditure of the University, with the corresponding vouchers and other documents, are rendered quarterly to the Controller and Auditor-General, who submits an annual report and abstract to Parliament.

I have the honour to be

Your Excellency's faithful and obedient servant,

EMLY.

*Bachelor of Engineering.*

Greer, Robert Thomas.

APPENDIX II

---

TWELFTH ANNUAL MEETING OF THE ROYAL UNIVERSITY OF  
IRELAND.

OCTOBER 27TH, 1893.

Twelfth Annual Meeting of the University was held on October 27th, 1893.

The Right Hon. Lord Morris, LL.D., the Pro-Vice-Chancellor, opened the proceedings with the following address :—

MY LORDS, LADIES, AND GENTLEMEN.—In the unavoidable absence of the distinguished Irishman, orator, and statesman who adds lustre to this University by being its Chancellor—the Marquis of Dufferin—and in the unavoidable absence of the time-honoured Lord Emly, the Vice-Chancellor of this University, the duty has devolved upon me merely by my seniority in the Senate on this occasion as a casual pro-Vice-Chancellor to preside. I believe it is usual for the presiding Senator upon an occasion like this, on the conferring of degrees, to make a few remarks on the subject and upon the position of the University. In the first place, I have the gratifying and, to me, personal satisfaction of stating that I am not to announce that there has been any loss among the number of the Senators since the last meeting. That is certainly very gratifying to me, personally, for during the short period of the existence of this University, on looking at the list I perceive that one half of the number who were appointed with me are now no more. On the immediate subject with reference to which we have met, namely, that of the conferring of the degrees, I shall probably consult your wishes, as I shall my own, by immediately addressing myself to the successful candidates and to the position which the University now occupies.

It appears, on taking stock of our position, that the total number of the candidates who were examined last year amounted to 2,857. Well, this year they are 2,951, that the number of graduates who were admitted to degrees last year was 201, and that this year there are now attending for the purpose of having degrees conferred 211, of whom 36 are ladies. By the charter of this University, degrees were left open to women, and even at that time, and as recently as the conferring of the charter on this University, many persons entertained doubts as to whether it was advisable that females should engage in academical studies. The question is no longer one of argument, it has become an accomplished fact; and this University has done its part in achievement, because from the list that I shall read to you it would appear that they are able to hold more than their own with the other sex, for which previously it was supposed academical degrees were reserved. Of the 36 females upon whom degrees are to be conferred no less than 14—a most remarkable proportion—do so with striking success, namely :—Miss Fleury, who has to be admitted to the M.D. degree, and who obtained the second gold medal; Miss Bell, M.B.; Miss Cantillon, M.A.; Miss Egan, who obtained the LL.B. degree; Miss Chapman, and Miss Joyn, who took the B.A. degree with first-class honours in modern literature; while in the B.A. degree in the second

class honours there was Miss Sayers, who was awarded this in classics; Miss Fogarty in modern literature, Miss Woods in the same department, Miss Stone the same, Miss Clements in history, Miss Keohler in history, Miss Buchanan in history, while to Miss Dickson there was awarded the travelling medical scholarship of £100. It is, therefore, not surprising that colleges for the spread of higher education for females are springing up, and I have observed that Archbishop Walsh has thrown himself into this with characteristic energy.

As regards the success of the male students, they stand thus—the four studentships of £100 per annum, tenable for three years, are carried off as follows:—In Classics, by Mr. M'Elberry, of the Queen's College, Belfast; in Mental Science, by Mr. Hogan, of the University College, Dublin; in History, by Mr. Cochrane, of Queen's College, Belfast, and in Mathematics, by Mr. Gibney, of University College, Dublin; while of the gold medals, Mr. Dempsey has obtained the first at the M.D. examination, and Mr. Gibney the gold medal in Mathematics at the M.A. examination. I have further to announce that—I believe in accordance with the wish of Convocation—the Senate have founded three Junior Fellowships, open to competition—male and female. I have endeavoured in the short time that I have had an opportunity of acquiring any knowledge of the practical working of the University during the past year, thus shortly to sum up to you our present position, a position which I think has come up to our expectations, although possibly not to our aspirations. This University was not founded as a teaching University, which is the primary definition, I believe, of a University, namely, a school for universal learning. But it has been most successful in the department which it was founded for, namely, as an examining University. It has no opportunity of teaching, as the Universities of Scotland have, by professorial lectures, or as the Universities of Oxford and Cambridge and Trinity College through Colleges. But in its own way it has carried out successfully, and without any friction, a lesson, a most useful lesson, in the position of this country, because it is a practical lesson, namely, that of toleration. This University is an object lesson of toleration. A senate, consisting of different creeds and different views upon many subjects, have yet been able by honourable compromise to carry out the objects for which it was founded without, so far as I am aware, any serious friction or difference. I shall now call upon the Secretary to read out the names of the gentlemen and of the ladies who, coming from these different schools and colleges, which they chose to go to, or from private education possibly, have met in the halls of this University in honourable rivalry for the degrees, rewards, and the prizes which we are in a position to offer.

Dr. J. Creed Meredith, one of the Secretaries of the University, then read the list of successful candidates for Degrees, and the persons named were presented by Dr. M'Grath, the other Secretary, to the Pro-Vice-Chancellor, who admitted them to their respective Degrees.

#### FACULTY OF LAW.
